REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance.
2. Regarding the claimed terms, the Examiner notes that a "general term must be understood in the context in which the inventor presents it." *In re Glaug* 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1-12 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings, . . . the inventor's lexicography must prevail . . ." *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.
3. The closest prior art Lawlor et al (U.S. PG No. 2002/0038289 A1) discloses a method for a client to authorize an automated clearing house transaction.
4. JP 2007116281 A Yano, Fukio et al discloses a DHCP operation system in which network parameters can be assigned dynamically only to a client used by an authorized user. However, neither Lawlor nor Yano singularly or in combination discloses the recited feature:
 - a. As per claims 1, 7 and 13 "receiving ACH transaction parameters, after verification of the authentication credentials, including whether the ACH transaction from a first account to the second account is at least one of one-time, recurring, and scheduled, receiving an ACH authorization to issue an ACH credit to the second account, storing the ACH transaction parameters in a database,

determining a balance change condition in the second account, invoking the authorized ACH transaction based upon the determination of the balance change condition associated with the second account, creating an ACH entry based on the ACH authorization, executing the authorized ACH transaction based on the ACH transaction parameters, and providing the ACH entry to an originating depository financial institution, wherein the ACH entry is sent to an ACH operator and passed to a receiving depository financial institution (RDFI) causing the RDFC to debit the first account and credit the second account."

5. Yet even if the missing claimed elements were found in a reasonable number of references, a person of ordinary skill in the art at the time the invention was made would *not* have been motivated to include these missing elements in Lawlor or Yano since the parameters as claimed are usually not set as one-time, recurring, and scheduled.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Pierre E. Elisca whose telephone number is 571 272 6706. The Examiner can normally be reached on 6:30 to 5:00.
